Summary

Software Engineering student with hands-on experience in Java, web development, and software design. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and problem-solving, with a passion for developing scalable applications.

Skills

Technical Skills: Java, Python, SQL, JavaScript, HTML5, CSS3, PHP, MySQL, MongoDB, Git, GitHub, Bootstrap, Tailwind CSS, VS Code, Eclipse, Figma, Vercel, Render

Soft Skills: Problem Solving, Communication, Teamwork, Leadership, Adaptability, Attention to Detail

Education

K. Ramakrishnan College of Engineering, B. Tech Information Technology (2023 – 2027)

- CGPA: 8.84/10

St. Anne's Girls Higher Secondary School (2021 - 2022)

- Percentage: 86.6%

Experience

Java Development Intern, CodSoft (Feb 2026 – Mar 2026)

- Developed Java applications using Object-Oriented Programming principles.
- Implemented problem-solving programs involving loops, functions, and collections.
- Strengthened debugging and software development skills.

Frontend Web Development Intern, Codetech IT Solutions (Aug 2025 – Sep 2025)

- Developed responsive web applications using HTML, CSS, JavaScript, and Bootstrap.
- Improved user interfaces through responsive layouts and reusable components.
- Collaborated on frontend projects following modern web development practices.

Projects

Focus Mode Optimizer (MERN Stack) | [GitHub](#)

- Developed a full-stack productivity application using the MERN stack.
- Implemented task scheduling, reminders, and progress tracking.
- Integrated frontend, backend, and database to deliver seamless task management functionality.

Career Guidance Chatbot (HTML, CSS, JavaScript) | [GitHub](#)

- Developed a responsive web application to help students explore career options after 12th grade.
- Designed an interactive chatbot interface to guide users based on their interests and career preferences.
- Developed a responsive interface using HTML, CSS, and JavaScript to provide an intuitive user experience.

Room Reservation System (HTML, CSS, Java, PHP, SQL) | [GitHub](#)

- Developed a web-based room reservation system for room booking, customer management, billing, and check-in/check-out operations.
- Implemented CRUD operations and integrated MySQL for efficient data storage and retrieval.
- Designed a user-friendly interface to improve operational efficiency and reduce manual workload.

Certifications

- AWS Cloud Practitioner
- The Joy of Computing using Python – NPTEL
- GenAI – Microsoft
- Artificial Intelligence & Machine Learning – NASSCOM
